Introducing Our New Multipack Structure – Improved Clarity and Sustainability

Starting **January 2, 2026**, FlexLink will implement a new multipack structure for selected fasteners and accessories in the **XC and TC platforms**. This update is designed to make ordering easier, improve consistency, and support our sustainability goals.

What's Changing?

- **Clearer Naming Convention on sale items:**
  Multipacks will now include a "Q" designation to indicate quantity:
  - Example: **XCAN 5 Q10** = 10 pieces
  - Example: **XCAN 5 Q100** = 100 pieces
- **Single-Piece Items:**
  Individual components (e.g., XCAN 8) remain assembly items and cannot be ordered separately.
- **Simplified Ordering:**
  Each bag or box is sold as **one unit**, making order quantities straightforward.
- **Sustainability Focus:**
  New packaging materials and optimised sizes will reduce single-use plastic by an estimated **60,000 pouches annually** and lower warehouse handling.

Benefits for You

- Easier to understand and order the correct quantity
- More efficient handling in production and assembly
- Environmentally responsible packaging

Affected Products

This update initially applies to fasteners and accessories in the XC and TC platforms. Additional products will follow later in the project.
The following appendix will show the new items that will be introduced and the old items that will be closed. Since this is a direct transition, all will change on the 2nd of January.

For detailed information, see:

- Appendix A – New structure and sales items
- Appendix B – Discontinuing redundant items

Thank you for your continued partnership as we work toward a more sustainable and efficient future.
