FLEXLINK®

a coesia company

OPTILAB X

Boost efficiency in your optical lab

With over 20 years of experience, FlexLink delivers modular, plug-and-play conveyor solutions designed for fast installation and easy modifications. Our systems offer standardized tray handling, smart routing with OEE data, and advanced buffering for seamless automation.

A closer look at OPTILAB X

OPTILAB X features conveyor integrations designed for fast and easy installation.
The system offers modular plug-and-play conveyors for faster design and simple modifications, standard tray handling to rotate, transfer, and elevate trays, as well as smart tray routing with integrated OEE data collection. Additionally, the tray "Resort" function enables advanced sorting and buffering, enhancing overall lab efficiency.

Features and performance

Conveyor geometry	Single Beam or Twin Beam
Conveyor platform	XH or OptiLabX
Tray dimensions *(W×D×H)*	8.63 × 10.25 × 2.75 in
Material (conveyor)	Aluminum frame
Guide rail configuration	Fixed aluminum
Voltage requirement	110V, 240V, 400 VAC

Leading lab automation for the Optical industry

Expert support at every stage of your project

From lab layout and master planning to complete turnkey installations, our experienced team delivers the latest, most innovative solutions for handling optical trays. With every project, FlexLink pushes automation forward advancing tray conveying, smart stacking and sorting, and robotics to the next level.

Modular by design
