### Patents

Essential parts of the FlexLink product range are protected by patents and design regulations.

Drawings are made to European standards.

1. How to read the catalogue: Open the catalogue and from the Table of content or the PDF navigation bar locate the group in which the part you want to find is present. Turn over to the concerned page number by a "click". Now find out the figure of the part you wish to order. Jot down the part number against that particular figure number from the text. In case, if you have the part number and you need the other details, the part index can be used. The part index (at the end of the catalogue) will give you the figure and page number of the part you wish to order.

2. How to order spare parts: The part number and the description of the part required should be invariably mentioned in the order as per the catalogue text. The latest part number as conveyed through our service circulars should only appear on the order. In case of ordering colored components, colour code of the components should be mentioned. The quantity shown against the part number is the quantity per unit for that group so that particular quantity should be multiplied by the number of sets required.

3. Abbreviations: The following abbreviations are used in this catalogue:

assly.	Assembly
V	Volts
N.I.	Not illustrated
W	Watt
Comp.	Complete
Fr	Front
Std.	Standard
L	Length
A/t.	Alternate
Rr	Rear
L.H.	Left hand
R.H.	Right hand
AR	As required
<i>(Part number)</i>	Part number presented in "parantheses" and in Italic character style
*)	These items can only be purchased as part of a kit and when an item has an * the corresponding item always is placed between brackets (..) see above.
Recommended Spare part	Parts which are usually kept in stock and have short turnaround (See item 4)

4. Recommended Spare parts:

Several items of the complete spare parts overview are earmarked as recommended spare parts. FlexLink advises its cus-

tomers to purchase and stock these specific items for replacement in case of failure of the original item. The recommended spares are limited to only these items for which the cost of buying is in a fair relationship to the risk (i.e. probability \* impact) of sudden failure. It merely consists of wear parts and some electrical and pneumatic components.
