REACH Compliance Statement

FlexLink hereby confirms that FlexLink products comply with the requirements of the REACH **Regulation (EC) No. 1907/2006**, including obligations concerning substances in articles.

General Compliance

- FlexLink products are classified as articles under the REACH regulation.
- FlexLink products are not intended to release chemical substances under normal or reasonably foreseeable conditions of use.
- No registration nor information obligations apply for the substances contained in FlexLink products in accordance with REACH Regulation (EC) No. 1907/2006, article 7(1).
- FlexLink continuously ensure that material used by FlexLink suppliers meet obligations under REACH and that information regarding Candidate List substances is communicated along the supply chain.

Exceptions

Products Containing SVHC Substances Above 0,1% (Article 33)

- Due to a new substance added on the SVHC list on January 26, 2024, FlexLink carry a few specific products that do contain one substance at concentrations above 0,1% by weight. The substance Bumetrizole (CAS-3896-11-5) was added to the Candidate list since it's very persistent and has bioaccumulate properties
(vPvB). The substance is part of a material used in some FlexLink friction tops chains and has a concentration between 0,1% and 1% as weight by weight of the final product (the link). Reason for using it is to make the friction material better withstand UV-light. For these items, FlexLink fulfils its legal communication obligations by informing recipients of the presence of such substance.

- Affected products are reported to the ECHA SCIP database according to Waste Directive 2008/98/EG.
